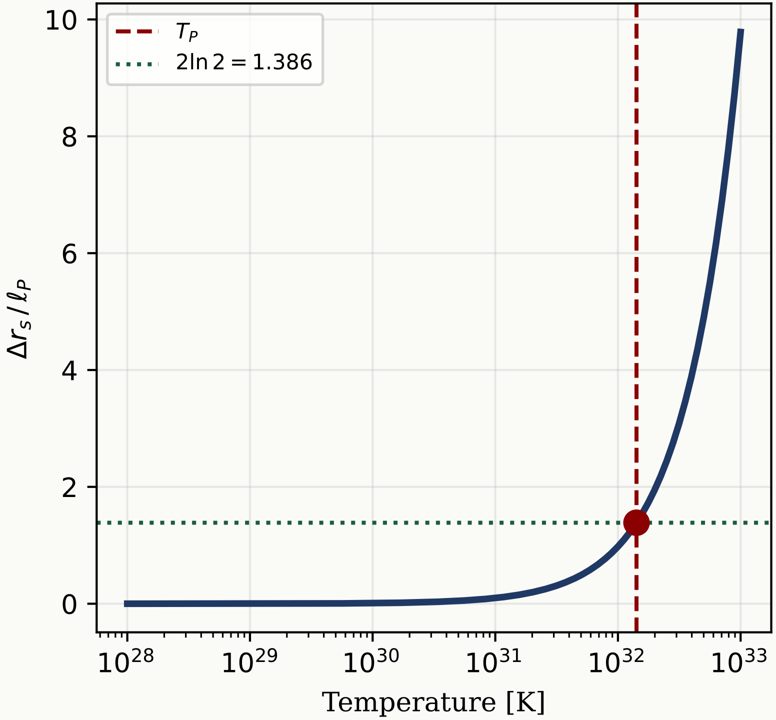
The Planck Coincidence: delta_r(T_P) = 2*ln(2)*l_P [Exact]

Approach to Planck Coincidence



Algebraic Proof

```
Planck Coincidence (Exact)

Substitute T_P = sqrt(hbar*c^5 / G*k_B^2):

delta_r(T_P) = 2G*k_B*ln2/c^4 * sqrt(hbar*c^5/G*k_B^2)

             = 2*ln(2) * sqrt(hbar*G/c^3)

             = 2*ln(2) * l_P    [exact]

All constants cancel.
Computed:  delta_r(T_P)/l_P = 1.386294
Expected:  2*ln(2)          = 1.386294
```
